

## Assignment 2.3

### 1. How to Import SAS XPORT Files into R With The foreign package

We can import SAS XPORT Files into R using `read.xport(file)` , where file is the path to the file function of foreign package

### 2. How To Import SAS Files into R With The haven Package?

Use `read_sas("path to file", "path to formats catalog")` from haven package to read SAS Files

### 3. How to read Weka Attribute-Relation File Format (ARFF) files in R?

We can use `read.arff(file)` function on foreign package to read arff files in R

### 4. How to read a heavy csv/tsv file using readr package?

Using `read_csv(file, col_names = TRUE)` function from readr package we can read csv files

`read_tsv(file, col_names = TRUE)` is used to read tsv files and `read_delim(file, delim, col_names = TRUE)` is the general function. Here file is the path to file , delim is the type of delimiter (comma,tab e.t.c)
